

How to Restore EMCenter Version

1. Hello everyone, This video reviews how to restore the main system to a previous version, or restore a specific card back a version

2. To restore a card to a previous version from the home page, select the slot number of the card you wish to restore on the left-hand side.

a. On the card info page next to software version, there will be an option to Restore Embedded Software. If a restore is available, the button text will be white.
