

How to update my TILE key's license string

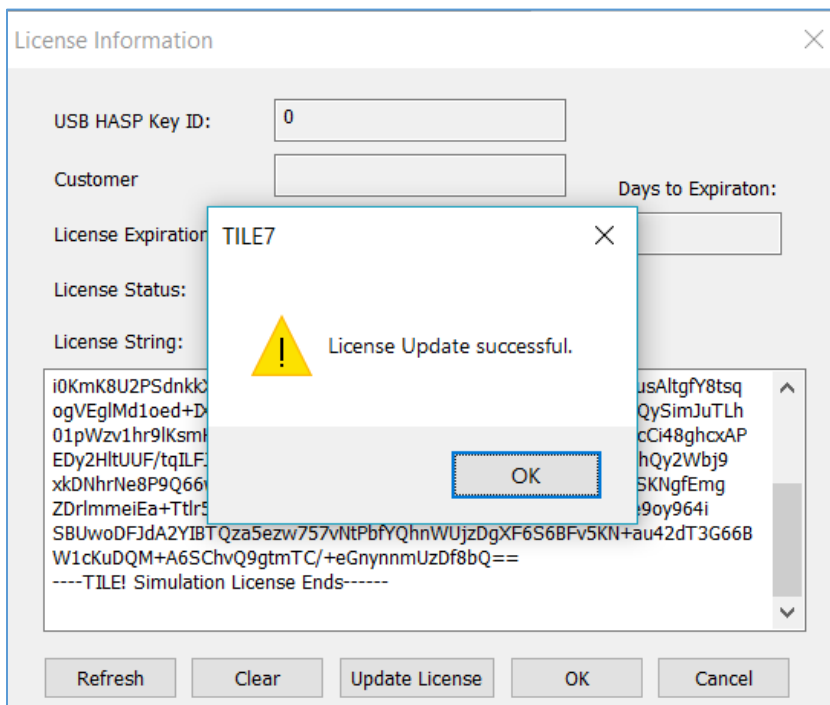

1. Hello everyone, this video will explain how to update your license string for TILE.
2. After contacting the software team to renew your license contract, they will send you an email with your new license string.
3. First, open the email from ETS-Lindgren with the TILE license string.

4. Click inside the email, then press the keyboard keys "Ctrl + A" to select all, and then "Ctrl + C" to copy the entire email.
5. Plug-in the TILE USB license key and make sure the red indicator light is on.

6. Open TILE, and go to the toolbar menu Help and then License. This opens the license information window.
7. At the bottom of the window use the "Clear" button to remove the old license string.
8. Then click inside the text box, and press the keyboard keys "Ctrl + V" to paste the license string from the email.
9. Finally, select the "Update License" button.
10. You should see the following popup saying, "License Update Successful."

11. Your license status and expiration date should now change to reflect your new license information.
12. Thank you for watching this video.
